product descriptions

MEDICAL DEVICE

THREAD

PDO (Polydioxonone)

PDO (Polydioxonone) Threads lift and tighten sagging skin tissues by inducing collagen production. This lifting method involves the implantation of multiple, fine Polydioxanone (PDO) threads, into the subcutaneous layer of the skin creating a vectorial network to support the tissue.

CLINICAL COSMETICS

ART LINER INTENSIVE SERUM (for face / for body)

β -Aescin (natural extract of horse chestnut tree)

1. Art liner intensive serum is a special product that does not contain chemicals such as preservatives and steroids. β -Aescin, a natural extract of horse chestnut, reduces the number and size of fat cell membranes to reduce the volume of face and body line safely.
2. β -Aescin is an effective product for promoting lymph circulation, removing wastes in the body, and increasing skin elasticity V-line face and slim body line.
3. Helps to remove edema and cellulite to make a smoother face and body line

product descriptions

CLINICAL COSMETICS

NANOMAX

Original Skin Booster

1. Total anti-aging skin booster for moist, elastic, and radiant skin
2. A product that contains various active ingredients such as EGF, IGF, BFGF, 12 amino acids, vitamins, and coenzymes in an optimized ratio

PREMIUM MESO GLOW (No. 21/ No. 23)

Semi-permanent makeup with MTS

1. Tone-up booster serum based on plant stem cells and natural fermentation extracts
2. By inhibiting melanin activity, it reduces blemishes, freckles, problem spots, and colored skin tone, resulting in clear, transparent skin.
3. All-in-one product that can manage whitening, redness, wrinkles, and moisture all at once
4. It functions as a skin tone corrector and can be used as a toning cream. Toned skin can be maintained for the duration of the 28-day skin regeneration cycle associated with Mts treatment.

product descriptions

ACNE & PEELING

ALA REVOLUTION GEL (7.5%, 10%, 16%, 20%)

Advanced treatment techniques to destroy acne bacteria

1. Photodynamic therapy is a cutting-edge treatment procedure for eradicating acne germs.
2. Easily eliminate acne germs by using the product and PDT with two processes (IPL)
When the product is placed to the acne region and exposed to light, it absorbs the light's heat energy and selectively removes acne germs.
3. A significant result can be visible in a short period of time with the treatment alone, without additional acne medication.
4. The primary constituent, 5-ALA, is a naturally occurring amino acid that is found in protein.
A non-toxic component that stimulates cell division and aids in skin regeneration

Patent 10-0963162
Stabilization method of
5-aminolevulinic acid(ALA)

product descriptions

ACNE & PEELING

RED PEEL® System Kit

Safe and effective natural basis for TCA peeling

1. Red Peel is a product certified for wrinkle improvement. It helps to improve wrinkles by restoring damaged collagen and promoting cell regeneration at the same time as peeling.
2. The concentration of TCA can be adjusted according to the user, so safe treatment is possible, and downtime is short.

RETINOL PEEL CREAM-RE10

Soft PEEL

1. It is a peeling agent with powerful antioxidant properties of retinol (10%). It removes signs of aging such as skin function improvement, wrinkles, spots, skin texture improvement, whitening, and facial line changes.
2. A significant benefit of retinol peeling is the lifting and anti-aging of the facial lines. Retinol encourages fibroblasts to produce collagen, enhancing skin suppleness and assisting in the reduction of wrinkles on the surface of the skin..

Product descriptions

ACNE & PEELING

FRUIT PEEL SYSTEM

Soft PEEL

1. It is a 4 different peeling system blended with active ingredients tailored to the skin type and areas of concern. You can choose from various peeling functions according to your needs, so you can achieve more effective and satisfying peeling.

2. The fruit peeling system is a gentle peeling method based on fermented vegetable extracts. It is recommended for those who are looking for a peel that does not interfere with daily life.
